Save the Babies

INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent. or nearly one-quarter, die before they reach one year, thirty-seven per cent. or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save many of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, injections and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. There can be no danger in the use of Castoria if it bears the signature of J. C. H. Fletcher.

Genuine Castoria always bears the signature of J. C. H. Fletcher.

Paint Without Oil

Remarkable Discovery That Cuts
Down the Cost of Paint Seventy-
Five Per Cent.

A Free Trial Package is Mailed to
Everyone Who Writes.

A. L. Rice, a prominent manufacturer
of Adams, N. Y., has discovered a
process of making a new kind of paint
without the use of oil. He calls it
Powderpaint. It comes in the form of a
dry powder and all that is required is
cold water to mix it. The paint weathers
proof, fire proof, sanitary and durable
for outside or inside painting. It is the
cement principle applied to paint. It
adheres to any surface, wood, stone or
brick, spreads and looks like oil paint
and costs about one-fourth as much.

Write to Mr. A. L. Rice, Manufactur-
er, 127 North Street, Adams, N. Y., and
he will send you a free trial package,
also color card and full information
showing you how you can save a good
many dollars. Write today.

Cured His RUPTURE

I was badly ruptured while lifting a trunk
several years ago. Doctors said my only hope of
cure was an operation. Trusses did me no good.
Finally I got hold of something that quickly and
completely cured me. Years have passed and the
rupture has never returned, although I am doing
hard work as a carpenter. "There was no opera-
tion, no lost time, no trouble. I have nothing to
sell, but will give full information about how you
may find a complete cure without operation. If
you write to me, Eugene M. Fulton, Carpenter,
612½ Marcellus Avenue, Monaca, N. J., better
cut out this notice and show it to any others who
are ruptured—you may save a life or at least stop
the misery of rupture and the worry and danger
of an operation.

AND HE WAS RIGHT

When Trouble Comes a Bank Account
Becomes a Big Asset.

"There is nothing else on earth as
satisfying as a snug bank account
when you need money in a hurry."
said a customer of the First National
of Conneltsville as he drew \$100 to
send to his son who had been serious-
ly hurt in a far away city.—Adv.

REVIVING BASEBALL.
 With the increased interest in athletics, and the larger place outdoor sports of all kinds is taking in public notice, there is no reason why Connelville should not be able to form a fast baseball team and provide the devotees of the great national game with some splendid sport during the approaching season.
 We have a sufficient number of men of means whose interest in baseball qualifies them to be the backbone of a club of such caliber as would be able to give Connelville a prominent place among the minor league teams. We have a constantly increasing crowd of enthusiastic fans, both in the city and the neighboring towns, who would be glad of the opportunity to do their full part in supporting a series of games. Players who have shown their capabilities and strength are available. We have ground suitable for a diamond and means of transportation reaching all sections of the Connelville district from which to draw patronage. All these things and conditions are an assurance that a well-selected team, backed by Connelville "Pep" of the 1920 variety, would have a successful season. It would help to advertise the city, bring more business to its merchants and provide wholesome recreation for many persons who would otherwise be deprived of privileges of this character.
 It is to be hoped, therefore, that the plans under way to put a club in the field will be even more successful than the promoters hope, and that the encouragement given the revival of the sport in this city will be all that is necessary.

"GET BACK TO EARTH."
 While the promoters must bear the responsibility for much of the increase in the cost of living, individual buyers who have been yielding to extravagant fancies and seeking to satisfy them without regard to the expense involved, are more than any other cause, making the time of a return to normal and sane conditions still more uncertain and prolonged.
 "Get your heads out of the clouds, get back to earth and eliminate all extravagance and waste," is the wise counsel of Director James Foust, of the Bureau of Food, Pennsylvania Department of Agriculture, offers as the solution of the very serious problem of increasing costs of living.
 Director Foust finds from actual observation in handling the food problems in the state that "we are living in an abnormal atmosphere and while there may be profiteering by some of our dealers, yet most of the responsibility for the present high prices of food stuffs rests with us and our extravagant waste and are our greatest faults."

An illustration, which in principle is familiar to many persons right here at home, is given by Director Foust. "Last fall," he says, "in a certain market in this state, a farmer placed on display his supply of roasting ears at 18 cents a dozen. A short distance away, in the same market, another farmer, selling the same grade of corn, asked 35 cents for a dozen ears. The farmer selling his corn at the higher figure quickly disposed of his stock, women rushing by the stand where corn was sold for 18 cents to purchase a dozen at 35 cents. The first farmer raised the price of his corn to 25 cents and within half an hour he was sold out. Again, it is pointed out as an illustration coming under Director Foust's notice that if two shoe merchants, offering the same grade of shoes, place their shoes on sale at different prices, the women and men will patronize the shop where the highest price are asked.
 Careless buyers may have no objection to these things, or if they have, attention has been paid to them. But the buyer who is striving to keep his purchases within the limits of his income has noticed this tendency to "ward" willful extravagance. The merchants cannot be blamed if customers insist upon satisfying their desire to spend money lavishly. It is the merchant's business to sell goods and supply the wants of his patrons, but everybody who has a common sense can get along without always buying those articles that cost the most money.

To check this crazy of spending is above all other things most useful to bring about a reduction in the cost of living for everybody. "Let us do without the things we do not absolutely require," Director Foust urges. "Buy only the things we need and the cost of living will drop at once."
 The waste in the average home in Connelville is enormous. If we will estimate this waste, for the things we do not absolutely require and get back to sane simple living again, the major portion of the high cost of living problem will have been solved.
 The Connelville Courier through the Council of these things, the greater will be the hardship to be endured when necessity will compel the practice of economy. We cannot go along indefinitely on the present scale of waste, spending every dollar as fast as earned, and hope to escape paying the penalty which will come day-and not so remote at that—as exalted. Better "get back to earth," as Director Foust so wisely advises be done.

To read the earnest, sincere and hearty messages, like Colonel Thompson and Colonel Martin have given the people of Connelville through the Courier, ought to make us feel that we have been all too sparing to our appreciation of the magnificent things done by the boys of Company D.

the mad rush from day to day to recall the assured reward of those who give their life for another and so ask, "Are we, too, willing to render our need of service?"

"Smooth as silk, eh? —Same here"
 —Chesterfield

TALK about a smooth, even-burning smoke, Chesterfields are all that and then some—never "miss," never fail to "satisfy." You never hear a "knock" on Chesterfields.

For Chesterfields are made of the real thing—genuine Turkish tobaccos, mind you, the pick of the crop, blended with the very choicest Domestic tobaccos that grow.

And what a blend! It actually brings out the hidden flavor of the leaf—a flavor you never guessed was there.

What's more, no other blend is like it, or can be, for the blend is our private formula—it can't be copied.

Lygett & Sons Ltd.

And the flavor is sealed in by the extra, moisture-proof wrapper on every package.

A Comparison of French Government Loans

4% Loan of 1917 5% Victory Loan
 5% Loan of 1920

IN view of the interest in French Government Internal Loans it has become necessary for bankers as well as investors to have at their disposal a comparison of the principal issues. We have therefore prepared a chart which gives for each issue the present income in francs and in dollars, with a 1c change in the value of the franc from 7c to 19c, the increase in income as the franc recovers its exchange value, and the comparative profits and income at current rates for each loan.

Also a graphic chart which shows the fluctuations in the French 3% and 5% Reptes since 1798.

This chart should be in the hands of every banker, manufacturer, exporter and investor for present and future reference. Complimentary copy sent on request for pamphlet No. H-80.

I cannot say enough for them and their great work." Foley Kidney Pills help the kidneys to do their work in ridding the system of the poisonous waste matter that causes so many aches and pains.
